

RPM HIRE

PORTABOOMS

are a safe traffic control method that protect a workzone. The Portaboom gates are an easily installed, operated traffic barrier which enables worksites to replace unsafe stop/slow practices.

RPM Hire equipment is utilised by some of Australia's most well respected, road authorities, traffic management and construction companies for the management of small to large projects.

KEY FEATURES

- Easy installation/setup
- Physical barrier that protects the work zone
- Replaces current unsafe traffic control methods
- Remotely controlled onsite by a traffic controller
- Quick and easy one person operation

IDEAL USAGE

- Active Construction Sites
- Standard Roads
- Freeways and Highways
- Tunnel and Event Closures

Supplying customers high quality, Australian manufactured equipment to meet their hiring needs and ensuring the delivery and fulfillment of each job, is as good as the one before!

Hire equipment daily, weekly or monthly with special rates available for long term hire.
