

T-LIGHT

The ultimate solution for temporary street lighting when the existing street lighting is removed or additional lighting is required, during road projects.

RPM Hire equipment is utilised by Australia's most well respected, road authorities, traffic management and construction companies for the management of small to large projects.

KEY FEATURES

- Solar powered with a diesel back-up generator
- 6 month of autonomous operation time
- Compliant street lighting for all roads including Motorway category (v3)
- Fully automatic – the unit will turn on at sunset and switch off at sunrise
- Hydraulic support legs for easy levelling
- Built for the rigorous construction environment

APPLICATIONS

- Construction Sites
- Night Road Works
- Emergency Lighting
- Mining & Military Sites
- Events & Concerts
- Temporary Car Parks
- Residential areas where silence is required

Keeping Traffic Moving. Whether you need to keep traffic moving for road works, construction projects or events, we can provide the equipment you need to safely and efficiently complete your project.
