## Safety Barrier System Acceptance Conditions

## HighwayGuard Safety Barrier - Temporary

|  | Issue Date: 16 December 2019 | Supplier: Ingal Civil Products |
| :---: | :---: | :---: |
|  | These conditions take precedence over any instructions in the Product Manual. <br> These acceptance conditions should be read in conjunction with the Product Manual and Transport for NSW Specification R132 - Safety Barrier Systems and Austroads Guide to Road Design Part 6:Roadside Design, Safety and Barriers. <br> Transport for NSW may withdraw or modify this acceptance at any time without notice. Users should refer to the Transport for NSW website to ensure they have the latest version of the conditions related to this product. <br> Acceptance of this product does not place any obligation on Transport for NSW, or its contractors, to purchase or use the product. |  |

| Status | Accepted - may be used on the classified road network |
| :--- | :--- |
| Product accepted | HighwayGuard Safety Barrier |
|  | $\frac{\text { Variants }}{\text { Variants }}$ |
|  | Variants that are NOT listed above are NOT recommended for acceptance. |
| Accepted speed | $100 \mathrm{~km} / \mathrm{h}$ |

## Tested Outcomes

| Containment Level | Point of Redirection |  | Tested Article Length (m) | Anchor/Post Spacing (m) | Dynamic Deflection (m) | Working Width (m) | Notes |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Leading (m) | Trailing (m) |  |  |  |  |  |
| MASH TL3 | Interface between the barrier and the end treatment |  | 120 | 58 | 1.93 | 2.47 |  |
| MASH TL4 | 30 | 30 | 120 | 58 | 2.16 | 3.51 |  |

## Approved Connections

| Crash Cushions or Terminals must be fitted to both ends of a barrier |  |
| :--- | :--- |
| Public Domain Products | Not Permitted |
| W-Beam Guardrail | Not Permitted |
| Thrie-Beam Guardrail | Not Permitted |
| Concrete | Qroprietary Products <br> QUADGUARD CZ Steel Rail <br> Crash Cushion <br> • Refer to QUADGUARD CZ Crash Cushion Technical Conditions for Use. <br> • terminal to the barrier. <br> - May only be installed where reverse impacts are highly improbable and a risk assessment has <br> been completed and steps undertaken to mitigate any risks identified. <br> - Not permitted as a terminal on a flare. |

|  | - Refer to UNIVERSAL TAU-II Crash Cushion Technical Conditions for Use. <br> - The HighwayGuard to Universal TAU-II transition must be used to connect the terminal to the <br> barrier. |
| :--- | :--- |
| UNIVERSAL TAU-II Crash |  |
| Cushion | May only be installed where reverse impacts are highly improbable and a risk assessment has <br> been completed and steps undertaken to mitigate any risks identified. <br> - Not permitted as a terminal on a flare. |

## Design Guidance

| This product must be installed and maintained in accordance with the Product Manual and Transport for NSW specifications |  |
| :--- | :--- |
| Minimum installation length | 120 metres between crash cushions/terminals (tested article) |
| System width (m) | 0.54 metres |
| Minimum distance to excavation | Recorded dynamic deflection |
| Slope limit | Side slope limit: 12.5 Horizontal to 1 Vertical (8\%) |
| Systems conditions | 1. Installation without an end treatment listed above is NOT permitted. <br> 2. Installation on top of a kerb is not recommended <br> 3. Flaring across the clear zone without a terminal listed above is NOT permitted. |
| Gore area use | Permitted |
| Pedestrian area use | Permitted - consider potential for snagging and deflection |
| Cycleway use | Permitted - consider potential for snagging and deflection |
| Frequent impact likely | Permitted |
| Remote location | Permitted |
| Median use | Permitted |

| Foundation Pavement Conditions |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Pavement | Use | Accepted Speed (max) | Post/Pin Spacing (m) | Post/Pin Type | Pavement Construction |
| Concrete | Not Permitted |  |  |  |  |
| Deep lift asphaltic concrete | Not Permitted |  |  |  |  |
| Asphaltic concrete over granular pavement | Permitted | $100 \mathrm{~km} / \mathrm{h}$ | 58 | M30 x 365mm drop in pin, flat top pin | 150mm asphalt concrete over granular subbase |
| Flush seal over granular pavement | Not Permitted |  |  |  |  |
| Unsealed compacted formation | Not Permitted |  |  |  |  |

Note: Installation in pavement conditions not listed above have not been justified to the Transport for NSW's satisfaction.
