

# STEEL ROAD PLATES

*Heavy duty AS3678-250 grade carbon steel with non-slip coating.*

## PRODUCT OVERVIEW

Temporary steel road plates allow for continued vehicle movement and access during construction works, roadworks, roads under excavation and other areas. RPM Hire's steel road plates have been specifically designed from strong heavy-duty steel, complete with non-slip coating. The road plates incorporate a middle lifting point to allow for safe lifting and lowering. In addition to prefabricated 4 corner holes for deck pins/road spikes to hold the road plate in place.

## FEATURES

- Heavy duty 25mm thick carbon steel plate, AS3678-250 GRADE
- Centre lifting point with integrated for RANGER LOCK-N-LIFT lifting hook
- 4 x Prefabricated corner holes for deck pins
- Range of sizes available for hire
- Highly visible bright yellow coating, making the road plate easily recognisable onsite
- Coated with Dulux Duremax non-slip coating
- ID marking and weight specifications displayed on each plate (e.g. RPM565KG)

**Do you require a Temporary Works Design?** RPM Hire can assist in obtaining the necessary equipment compliance documents for your project.

### RANGER LOCK N LIFT

Increased safety with the innovative ranger "Lock N Lift Hook". Each plate has a center lifting point, allowing for safer and more efficient steel plate installation/removal.
