

CCTV CAMERA TRAILERS

Portable camera trailers for live streaming and or video recording.

PRODUCT OVERVIEW

At RPM hire we have mobile CCTV trailer cameras available for hire. Powered by solar, the camera can record and live stream straight to a mobile or computer. Offering HDTV 1080p resolution, 10x optical zoom, and continuous 360° pan, allowing to easily follow moving objects. The mobile CCTV camera trailers are custom built to Australian standards. Featuring an adjustable mast, with the ability to set the mast height at 5 metres or 10 metres, to achieve maximum viewing.

CCTV CAMERA TRAILERS

CCTV camera trailers are road ready, portable units that can be rapidly deployed for traffic monitoring, construction security, and site surveillance.

The high-tech portable camera can zoom-in great detail and also provide a broad overview for when you need to stay on top of what's happening on your premises. WDR – Forensic Capture ensures great detail when there are both bright and darker spots in a scene. The camera's outstanding light-sensitivity means high-quality video even when it is recording in near darkness.

CCTV camera trailers can be used for temporary or long-term monitoring, depending on user requirements.
