

FLEYG

A revolutionary alternative to traditional “cold mix” asphaltting, that is 100% reusable, and 100% cleaner.

PRODUCT OVERVIEW

RPM Hire offer the latest steel road plate ramps available for hire. Introducing the Fleyg, the simpler and safer solution for ramping steel road plates. Fleyg are the ultimate noise-eliminating ramp solution for driving over steel road plates used to cover trenches in road construction. The Fleyg ramps are made primarily from rubber, which offers a noise-dampening effect.

FLEYG

Fleyg road ramps are water-repellent and non-slip, complete with reflective markings to improve their visibility on site.

KEY FEATURES & BENEFITS

- Quick and easy to install
- Noise reduction – does not clatter when driven over
- Increase safety by eliminating trip hazards
- Highly visible reflectors ensure ramps are visible both day and night
- Slip resistance – created with a special surface structure
- Can be reused – greater choice for the environment
- Cost-saving compared to ramps made using a coating
- Made from durable weather resistant materials
- Highly visible thanks to reflective markings
- Sustainable equipment hire choice – made from rubber that can be reused
- Made from recycled materials

APPLICATIONS

- Road plate reduction ramps can be used for a variety of applications.
- Driveway access ramps
- Road crossings ramps
- Excavation protection ramps
- Pedestrian access ramps
- Temporary roads ramps
- Crane access ramps
- Construction excavation crossing ramps
- Concrete protection ramps

SPECIFICATIONS

FLEYG	
Dimension	1000 x 400 x 42 mm
Weight	12 kg
