

# KLEMMFIX

Klemmfix is a barrier system made from high impact plastic used to assist with traffic guidance

## PRODUCT OVERVIEW

The high impact plastic allows for the barrier to restore to original state if struck by a vehicle. Klemmfix are a low cost, highly visible barrier available for hire throughout Australia. Klemmfix feature bright coloured panels with reflectors, that make the barrier visible at night and in changing weather conditions. These panels are then attached to yellow bases with a steel hook interlocking system.

Visibility

## KLEMMFIX

When it comes to road safety and keeping your team and passers-by safe, visibility is essential. The vivid Klemmfix barriers can be clearly seen by drivers from a long distance in the daylight, while the reflectors guarantee that road users will also be able to see them at night or in poor visibility conditions.

If you are operating a construction or roadworks project and are looking to enhance the safety of your site, then Klemmfix traffic barriers are the perfect solution. Ideal for use when space might be limited or where road markings might not be as visible.

## KEY FEATURES & BENEFITS

- Easy to install, reducing set up time and cost
- Interlocking system with steel hook
- Klemmfix panels are made from high impact strong plastic
- All weather durability
- Bright yellow bases/guide kerb
