

VARIABLE MESSAGE SIGN

The variable display informs, warns and guides motorists safely.

PRODUCT OVERVIEW

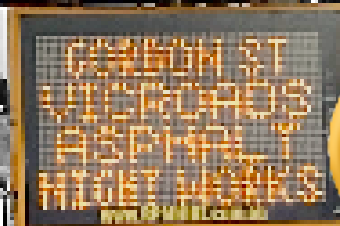

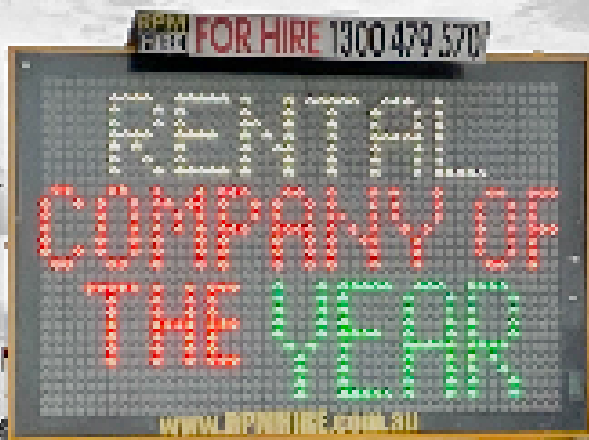

RPM Hire have Variable Message Signs (VMS) in both A and C sized boards, message boards are suitable for outdoor use, run via solar power and are environmentally friendly. The electronic signs can be rotated 360 degrees, to ensure messages are visible. The 5 colour LED full matrix lights brightly display messages on non-glare UV resistant screens. With remote programming capability, our team can make live message changes or provide customers with full control over their messages.

VARIABLE MESSAGE SIGN

VMS are a key element of dynamic traffic management systems. Depending on traffic situations, the variable display informs, warns and guides motorists safely.

VMS can be used to display information, provide warnings and safely guide motorists. Two different size VMS boards are available for hire, A-size (SML) and C-size (LGE).

RPM Hire provides message board hire, delivery, set up and maintenance throughout Australia.
