

RPM HIRE'S RANGE OF PORTABLE TRAFFIC LIGHTS

PORTABLE TRAILER MOUNTED TRAFFIC LIGHTS

The Portable Traffic Light is solar-powered and compliant with AS 4191:2015, these units can be set up and running in minutes in automatic or manual mode. Capable of 3 and 4-way communication, they're built for complex or extended traffic management scenarios where reliability is non-negotiable.

- Handles two-way and multi-way intersections
- Solar powered with battery backup - 24/7 operation
- High-visibility 200mm LED lanterns
- Fully compliant with Australian standards

TRILIGHT PORTABLE TRAFFIC LIGHTS

When speed of setup matters, the TriLight delivers. The tripod is lightweight, it can be deployed by one person in under 10 minutes with 20 hours of battery run time per charge. Three simple operating modes make it easy for anyone to use confidently on site.

- One person setup in under 10 minutes
- 20 hours run time per charge
- 3 operating modes including shuttle and plant crossing
- Compact and easy to transport
- These can also be mounted on barriers to minimise footprint

PEDESTRIAN TRAILER MOUNTED TRAFFIC LIGHTS

Where pedestrian safety is a priority alongside vehicle control, this is the right solution. Purpose-built to manage both vehicle and foot traffic, it ensures compliance and community confidence in areas where people and vehicles share the same space.

- Solar-powered and battery operated
- LED lanterns for high visibility
- Multi-way capable for intersection and T-Junction control
- Wireless or wired remote control
- Vehicle detection control options
